

SAL-54

Catalog Number: *SAL-54-5 Watt*

Product Type: *Solar Lighting*

Applications:

Aerial lighting without nearby power for docks, piers, road lighting, parking lots, pool areas, playgrounds, path ways, guard houses, out-houses and pavilions. This is a new, cost effective way to bring safety, security and aesthetics to your facility without expensive wiring and labor. It also supports the alternative energy "green" initiative.

Description:

Solar powered area light fixture. Features an anodized aluminum, marine-grade housing with integral solar panel, LED light source, encapsulated battery. Operates automatically dusk-to-dawn with photo-electric control and has high and low dimming proximity sensor for power conservation. Includes bracket and stainless steel mounting hardware for post or flat mounting.

Specifications:

- Light Source: 5 watt, (54) CREE LEDs, 6500K color
- Lumens: 420
- Battery: 12 volt, sealed lithium, 8Ah
- Solar Panel: 8 watt, Mono-cystilline
- Estimated Run Time: Low ~16 hours; High ~8 hours (based on solar charging condition)
- Mounting Height: ~10-12 feet
- Spacing: ~25-30 feet
- Dimension: Fixture
- Weight: 12lbs
